## Summary

---

Fullstack software engineer with professional experience in ideating, architecting and building solutions for digital products with a customer first approach. Looking to utilize my skills in development and design.

## Skills

---

Javascript	CSS   Bootstrap	OOP
TypeScript	Node	Jest
React	MongoDB	Shopify
HTML	Heroku	Azure
Git   Github	Web Accessibility	AWS

## Experience

---

### Akadenia | Fullstack Engineer | 08/2022 - 01/2023

- Built modern and responsive testable fullstack applications using industry best practices.
- API development and integration with the frontend for seamless user experience.
- Wrote automated tests to verify functionality and stability of mobile and web applications to improve performance.
- Conducted code reviews and gave feedback to my team members.

### 100Devs | Software Engineer | 10/2021- 08/2022

- Team collaborations in building modern fullstack web applications, API development and integration.
- Designed and implemented new features, debugged, fixed issues, wrote end to end tests resulting in improved performance and efficiency in various projects.
- Created and maintained project documentation.

## Projects

---

### [Projectagram](#) | Mobile and web app

Integrated with shopify where users can upload photos to place orders for reels for use in a handheld projector to store memories. Orders can be placed and delivery date determined.

### Hip Coffee Co | Fullstack web app

Cashiers can take coffee orders from customers with their names. Baristas can log into the app and see orders that have been placed, mark them as complete. Orders that have been completed will note which barista completed the orders.

## Awards, Certifications & Education

---

2018- present | University of Nairobi - Bachelor of Pharmacy
